PROFESSIONAL SUMMARY

Software Engineer with 4+ years building high-performance web platforms and production agentic AI systems. Delivered Full-Stack architectures serving 1M+ concurrent users and built RAG pipelines, MCP servers, and LangGraph agents in a regulated banking environment. Comfortable owning systems end-to-end, from UI to backend infrastructure to AI/LLM systems.

SKILLS

Languages: TypeScript, JavaScript, Python, PHP, SQL

Frontend: React, Next.js, Redux, Tailwind, Playwright

Backend: Node.js, Laravel, Laminas, MySQL, REST APIs, GraphQL, Redis, MongoDB, Git

AI & Agentic Systems: LangGraph, LangChain, MCP, Agentic AI, RAG, Prompt Engineering, LLMs

Cloud & DevOps: AWS (SES, SQS, S3, CloudWatch, RDS), Docker, GitHub Actions

EXPERIENCE

Paytm Payments Bank

Software Engineer • Noida, NCR

JUL '25 - PRESENT

- Architected and deployed **on-prem MCP servers** for Jira, Confluence, and File Server with OAuth/PAT auth, enabling secure AI-native context retrieval for 6+ teams across Tech, Compliance, Finance, InfoSec, and Business.
- Built an automated **RAG pipeline** (Python, ChromaDB) that scrapes and ingests 50+ notices and circulars daily, delivering results via MCP to LLM clients (Claude), replacing manual searches and handling 50–100 queries/day across 6 teams.
- Built a full-stack **Text-to-Query agent** (Next.js, LangGraph, self-hosted LLM) that converts natural-language requests into SQL via schema-grounded RAG, cutting query-authoring time from 1+ day to minutes for the CDS team.
- Built **RPA workflows** automating recurring regulatory filings (PPI statistics, ALE reporting) with complex cross-file calculations, eliminating a previously full-day manual compile-and-submit process.

White Rabbit Group

Senior Software Engineer • Kochi, Kerala

JAN '25 - JUL '25

- Architected and built a **Speech-to-Speech** conversational AI app (Next.js, Whisper, Groq) end-to-end for an EdTech client, enabling children to converse naturally with an AI tutor agent.
- Enabled **instant publishing** via Contentful + CI/CD (replacing a full-day manual deployment); resolved tech debt and lifted Spotify's SEO ranking from page 2 to page 1.
- Led a UI and **feature rebrand** for the Spotify Connect platform, partnering directly with client stakeholders to define requirements and prioritize improvements.

Software Engineer • Kochi, Kerala

JUL '22 - JAN '25

- Overhauled Game Awards Project (1M+ concurrent users); SSR + S3 image **optimization** cut load time from 4s to 1s and infra costs by 10%; added Bitbucket CI/CD, cleared Next.js/WordPress **tech debt**, and shipped with first-time **SEO** (unindexed to page 1).
- Migrated FaxItFast's legacy Zend platform to Laminas, resolving a **critical** password-security vulnerability; **rebuilt** a failure-prone queue/cron system with retries and parallel processing, and shipped major features including free user trials.
- Modernized CRCS's logistics platform; **migrated** .NET 4 to .NET 6 (cutting dev/build load time from 1 min to 15 sec) and built Angular UI **features**, shipping order classification across 4 new order types.
- Built the frontend for VendorBid, a roofing-industry web app used by 100+ daily users, implemented **pixel-accurate** UI from Figma designs, **real-time chat** via WebSockets, and shipped 25+ features across user and admin role-based scopes.

EDUCATION

SCMS School of Engineering and Technology

B-Tech, Computer Science

JUL '22

CERTIFICATIONS

IBM Certified AI Developer
